

TIME TRAVEL MACHINE

Yesterday, I went to Professor Madly's house, and I saw a big machine. It was neon yellow it had like 20 buttons of different colors and so many cables. I was so interested so I ask her 'what does this machine do?' 'This machine is a TIME TRAVEL MACHINE' she said to me 'wow that is great!!!' 'DO you want to try?' she asked me but I was so scared so I said 'No, Thank you' 'OK I want to try' she said and she pushed a yellow button and she said 'I want to go to yesterday because today I haven't slept!' And she was gone in a yellow flash.

TAN TAN TAN

SHE was
gone in a
yellow flash.

One day, Maxi went to Professor Madly's lab to see an invention. The invention was very small and portable and was a hat-helicopter machine. It worked when you say "up" and you put the machine on your head and start to go up. Maxi was very scared because he was scared of heights. In one moment the machine didn't work and Maxi fell. Maxi started to cry and Madly took an invention to stop him crying with a remote control. Madly pushed a button and Maxi stopped crying. Maxi was very surprised.

Paint Pot

Yesterday, we visited Professor Madly in her lab in Paris. She showed a very strange-looking machine. "Can we know what it does?" asked Patxiku. It is a paintbrush machine, you get the brush wet with the paint" said Professor Madly. "We can try" said Maria Pilar. "Of course" answered Madly heard like a (splash) looked at the children and Maria Pilar had her feet on the paint pot and was trying to take out the feet from the pot.

5 days ago, Eilidh went to Libes house to play. While they were there, they heard an elephant's scream coming from the neighbor's house. They went to investigate. When they rang the bell they noticed that the door was open. Carefully, they went in. Suddenly, they saw an elephant in the room next to professor Madly. "Why is there an elephant?" Eilidh asked, and Libe said "This is the end" "Here is an elephant because I'm trying my new machine" The professor ~~asked~~ answered. Then Libe said "what is it for?" "It's to understand what animals say." Said the professor. "But it doesn't work" "Oh" said Eilidh "We can try again" I have a solution" said Libe "Really?" said the professor "yes", we only have to know the machine and that's it. My mom always says (if you know something it gets fixed). So we have to try "The professor madly give the black machine to Libe "here we are" Libe knowed the machine and it broke. "O psss!" Said Libe.

The end.
